About the job

Job Description About Citco Citco is a global leader in fund services, corporate governance and related asset services with staff across 50 office locations worldwide. With more than \$1.8 trillion in assets under administration, we deliver end-to-end solutions and exceptional service to meet our clients' needs.

For more information about Citco, please visit www.citco.com

About The Team & Business Line Proprietary software solutions and innovation are at the core of what differentiates Citco in the alternative investment space. Through our network of global development centres, Citco invests heavily in technology development, security, and infrastructure to ensure our clients continue to receive award-winning products that underpin our commitment to service excellence.

Responsibilities Your Role:

- You will participate in the entire application lifecycle, focusing on coding and debugging.
- Design and develop Microservices systems with Python, Node.js, React, SQL, etc.
- Gather and address technical and design requirements
- Perform UI tests to optimize performance
- Plan, create and execute test cases applicable to user stories to ensure coverage for AExeo products
- Develop solutions that are scalable, high performing, maintainable and meet high quality standards
- Participate in peer reviews of code to ensure adherence to development standards
- Troubleshoot and debug applications
- Build reusable code and libraries for future use
- Participate and contribute on all team activities such as sprint planning, daily scrums and retrospectives
- Work closely with members of the Architecture and DevOps teams
- Communicate and provide updates on assigned tasks while taking ownership of assigned tasks
- Follow emerging technologies

Qualifications About You:

- You have a Bachelor's Degree in Engineering, Computer Science or equivalent.
- 2+ years of Application Development experience
- 2+ years of programming experience in Java/IDE Eclipse/Maven framework
- 2+ years of programming experience in NodeJs/Python
- 1+ years of experience with cloud technologies such as AWS, Azure, GCP
- Experience with CI/CD tools such as Jenkins, Bamboo or CodePipeline
- Experience with Project Management tools such as JIRA
- Knowledge of financial industry is highly desirable
- Self-motivated, innovative and analytical with strong attention to detail
- Strong sense of responsibility and service minded attitude
- Willingness to learn new skills and to contribute to a team culture centered on continuous improvement
- Organized, accurate and self-motivated
- Think creatively and propose options/solutions to challenges
- Excellent verbal and written communication skills with the ability to interact effectively in a global team environment

Salary Range: CAD \$70,000 - CAD \$94,000

- This position is not for an existing vacancy; we are building a candidate pool for future opportunities.

Our Benefits Your well-being is of paramount importance to us, and central to our success. We provide a range of benefits, training and education support, and flexible working arrangements to help you achieve success in your career while balancing personal needs. Ask us about specific benefits in your location.

We embrace diversity, prioritizing the hiring of people from diverse backgrounds. Our inclusive culture is a source of pride and strength, fostering innovation and mutual respect.

Citco welcomes and encourages applications from people with disabilities. Accommodation is available upon request for candidates taking part in all aspects of the selection.
