

ADARSHA BIKRAM G.C.

687 Seneca Hill Drive | Noth York, ON | 416-879-8324 | abn0nlyme@gmail.com | [ratmol](#) @ github

OBJECTIVE

Detail-oriented 5th-semester Computer Science student and aspiring Software Developer with a strong foundation in Large Language Model (LLM) architectures and data structures. Seeking to leverage hands-on experience in TypeScript, Git version control, and tool-calling implementation to contribute to [Company Name]'s development team while solving complex algorithmic challenges

TECHNICAL SKILLS

Languages: TypeScript, C++, JavaScript, PowerShell, SQL, HTML5/CSS3.

Generative AI: LLM Architecture, Context Window Management, Tool Calling, Agentic Workflows, Token Pruning, Context Compression.

Computer Science: Data Structures & Algorithms (DSA), Big O Analysis, Balanced Trees (AVL, Red-Black), Memory Management.

Tools & DevOps: Git, GitHub, Node.js, VS Code, Technical Documentation, Performance Benchmarking.

EXPERIENCE

Software Developer Intern

Deloitte | Toronto, ON

May 2025- August 2025

- **Technical Implementation:** Developed and maintained features using **TypeScript**, ensuring type-safety and reducing runtime errors.
- **Version Control & Collaboration:** Managed complex codebase health using **Git**; successfully resolved critical "unrelated history" merge conflicts and restored project integrity after directory failures.
- **Performance Optimization:** Analyzed and optimized algorithm complexity using **Big O notation**, specifically focusing on tree structures (AVL/Red-Black) to improve data retrieval efficiency.
- **AI Research & Integration:** Explored agentic workflows and context management for LLMs, implementing token pruning techniques to optimize model performance.

Generative AI Development

Seneca Polytechnic | North York, ON

Jan 2026 - Present

- Architected a technical framework for **context compression** in LLMs, focusing on token pruning and intelligent summarization to reduce inference costs.
- Developed custom **tool-calling** logic to enable AI agents to interact with external APIs and local file systems autonomously.

- Conducted performance analysis on LLM response latency and accuracy across varying context window sizes.

EDUCATION

Computer Programming

Seneca Polytechnic | North York, ON

May 2026

3.5 GPA

COMMUNICATION

- **Technical Documentation:** Experienced in drafting comprehensive technical reports, specifically regarding LLM context compression and architectural research.
- **Troubleshooting & Support:** Skilled at articulating complex technical issues (like Git merge errors) to team members to reach a collaborative resolution.
- **Adaptive Learning:** Proactively utilizes advanced research tools and peer-reviewed articles to stay updated on emerging AI trends and industry standards

LEADERSHIP

Led a hackathon in University of Waterloo for Hack the North Tournament.

Actively participated as a vice president in the AI Seneca Club.
